Explanations of the symbols used:---Co=Cases; D=Deaths.

New Delhi 3 (India); )
The 14th November 1949.

S. P. JAIN, for Registrar General, India.

# NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 506, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simila.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 8th October 1949.

<sup>\*</sup> In cases of towns where there have been an abnormal movement of population it is likely that the population estimates may not ficiently reliable for calculating the birth and death rates.

Explanation of symbols used:—B=Births; B.R.=Birth rate; C=Cholers; S.=Smallpox; P=Flague; F=Fevers; D. D.=Dysentery Diarrhoea; R.D.=Respiratory diseases; M.D.=Maternal Deaths; D.R.=Death rate; I.D.=Infantile Deaths (included in total deaths)

<sup>†</sup> Figures not available.

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India an some of the Indian States for the week ending the 8th October 1949—contd.

### RMMARKS

The figures of births and deaths—shown in this statement for week ending—the 8th October 1949 relate to 180 towns with an estimated population of 23,500 thousands. The total number of towns is 215 and their population is 28,345 thousands. Thus 84% of the total number of towns is presenting 89% of the total population is covered in this statement. The numbers of births and deaths recorded in those towns were 18,196 and 9,550 representing birth and death rates of 40.2 and 21.1 per thousand of the population respectively.

(A) Indian Provinces.— The data here relate to 160 towns with an estimated population of 21,371 thousands. Information from Bihar and Assam could not be included. The total number of towns is 191 and their population is 23,722 thousands. Thus 84% of the total towns representing 90% of the total population is covered. The numbers of births and deaths recorded in these towns were 16,855 and 8,806

representing birth and death rates of  $40\cdot0$  and  $21\cdot4$  per thousand of the population respectively. The table at the end gives the position by provinces.

Hathras in U.P. was the only town which had a high death rate of 58.5 per thousand of the population and this high death was to a considerable extent due to deaths from fevers.

(B) Unions and States.—The data here relate to 20 towns with an estimated population of 2,189 thousands. The total number of towns is 24 and their population is 2623 thousands. Thus 83% of the total number of towns representing 83% of the total population is covered. The numbers of births and deaths recorded in these towns were 1341 and 744 representing birth and death rates of 31.9 and 17.7 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.

In case of towns where there have been an abnormal movement of population, it is likely that the population estimates may not be sufficiently reliable for calculating the birth and doubt rates.

Explanation of symbols used: R = Births; B. R. = Birth rate; C. = Cholers; S. = Smallpox; P. = Plague; F. = Fevers; D. D. = Dysontry and Diagrhoes; R. D. = Respiratory diseases; D. R. = D ath rate; M.D. = Maternal Deaths; L.D. = Infant Deaths (included in total death\*)

<sup>†</sup> Figures not available.

The figures of births and deaths shown in this statement for week ending the 15th October 1949, relate to 177 towns with an estimated population of 23,075 thousands. The total number of towns is 215 and their population is 28,345 thousands. Thus 82% of the total number of towns representing 88% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 18,258 and 9,089 representing birth and death rates of 41.1 and 20.4 per thousand of the population respectively.

(A) Indian Provinces.—The data here relate to 158 towns with an estimated population of 21,048 thousands. Information from Bihar and Assam could not be included. total number of towns is 191 and their population is 23.722 thousands. Thus 83% of the total towns representing 89% of the total population is covered. The numbers of births and deaths recorded in these towns were 17,013 and 8,419 representing birth and death rates of 42 0 and 20.8 per thousand of the population respectively. The table at the end gives the position by provinces.

The towns of Banaras, Mirzapur-Vindhyaohal, Sambha in U. P. and Nasik in Bombay recorded high death rates of 56.1, 54.0 52.8, and 51.1 per thousand of the population respectively. In Banaras, Mirzapur-Vindhyachal and Sambhal, the high death rates were mainly due to deaths from fevers. None of the specified causes seems to be responsible for the high death rate in Nasik.

(B) Unions and States.—The data here 19 towns with an estimated population of 2,027 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 79% of the total number of towns representing 77% of the total population is covered. The numbers of births and deaths recorded in the contract of the second of the contract of the c numbers of births and deaths recorded in there towns were 1,245 and 648 representing birth and death rates of 31.9 and 16.7 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
